

# Inside the Shell

M C Usher

## Foreword

This series has been created around the coastal community of Ngawi (pronounced 'naa-wee'). A small fishing village which is located just five kilometres from Cape Palliser, the southernmost point of New Zealand's North Island. Known for having more bulldozers than permanent residents, this project scratches the hard-male surface and discovers what is holding the community together, the very backbone inside the shell.

The location is exposed, with intense and prolonged periods of high winds and heat during the summer months. With very few trees, what kind of person is prepared to endure these conditions?  
Only the strongest it seems.

Cook patties 75 °C

Beef Burger - meat patty  
Relish  
Aioli  
Lettuce, carrot, tomato  
onion, cheese, mayo

Beef works. add hash brown, bacon, egg.

Chicken Burger - chicken patty
